EXPERIENCE

Masteringbackend

Content & Education Lead / Technical Content Writer | March 2022 – Present | Remote

- Plan, develop and manage technical learning content covering backend engineering, Python, APIs, AI engineering, system design and modern software development.
- Write and publish practical, developer-focused technical articles that translate complex engineering concepts into clear and actionable learning resources, with **10+ published technical pieces**.
- Support the development and delivery of technical education programs, including **Python, Golang and AI Engineering bootcamps**.
- Coordinate instructors and contribute to editorial workflows, ensuring course materials, tutorials and learning resources are properly structured and delivered.
- Create quizzes and supporting learning materials to reinforce technical concepts and improve learner engagement.
- Support program and community growth through content promotion, email outreach and learner engagement initiatives.

The Concierge Lawyering

Client Operations Manager | March 2026 – Present | Remote

- Manage client communication, ensuring inquiries, updates and required information are handled clearly and professionally throughout the client journey.
- Coordinate client onboarding, including documentation collection, follow-ups and communication required to move clients through the onboarding process.
- Manage residency and compliance processes, tracking required documentation and following up with clients to ensure outstanding requirements are completed.
- Develop and maintain **Standard Operating Procedures (SOPs)** to document operational processes and improve consistency across workflows.
- Coordinate internal tasks and operational activities using **Jira, Zoho Mail and Zoho Cliq**.
- Maintain organized documentation and follow-up processes to help ensure client requests and operational tasks progress efficiently.

PROJECTS

Technical Writing Portfolio — 10+ Published Articles

Technical Writing • Backend • Python • AI • System Design

Produced and published 10+ technical articles covering Python automation, Docker, backend architecture, APIs, AI engineering, system design and Python file handling, translating complex technical concepts into practical and accessible learning resources.

Zeekwrites — Personal Technical Writing Portfolio

HTML • CSS • JavaScript • GitHub Pages

Designed and developed a personal portfolio website showcasing technical writing experience, published work, professional experience, services, technical topics and contact information.

Golang30 Bootcamp — Program Coordination

EdTech • Program Coordination • Content & Community

Coordinated the Golang30 technical bootcamp at Masteringbackend, supporting program activities, educational content, learner engagement and the overall organization and delivery of the learning program.

SKILLS

Technical Articles • Technical Editing • Program Coordination • Course Content • Learning Resources • Instructor Coordination • Learner Engagement • SOP Development • Problem Solving & Team Collaboration • Git & GitHub • Jira • Zoho • Notion • Google Workspace • Trello/Asana
